

**The Central Shenandoah
EMS Council presents...**

Super CE **March '08**

Featuring Asher Brand, M.D., Augusta Medical Center

“12 LEAD TRIAGE AND CARDIAC ARREST”

CSEMS has developed STEMI Triage protocol. This allows medic level providers to make a field triage decision in cooperation with receiving hospitals with emergent cath labs. This class is geared toward medic level providers. Review 12-lead application and simple interpretation. Cardiac arrest scenarios will also be reviewed. .

**March 8,
2008**
