

Attention CPR Instructors AHA announces Hands-Only CPR.

As CPR Instructors it is your role to integrate the new form of CPR, Hands-Only CPR, into your current course curriculum. AHA has provided hand outs that you can supply to your classes. You can find these materials along with new Lesson Maps to add to your Heartsaver and Health Care Provider manual under the Instructor Resources link. Also, please go to www.ahainstructornetwork.org for the web cast concerning Hands-Only CPR instruction. If you have any problems accessing either site please contact me. Thank you so much for providing quality CPR instruction!
